

DAC-35

Standalone Access Controller

DAC-35 standalone access controller is a cost-effective solution for indoor systems, where user access verification thru only Card, Card&PIN, or PIN-only is required. This durable model can be easily programmed with up to 1,500 users for a single door. DAC-35 offers a user-friendly set up menu, simplifying deployment, configuration and operation. DAC-35 is tamper-proof because it can connect a SL10 door control module.

Main Features
